

## Welcome to the Inaugural Edition of Gapman Solutions!

Greetings from Capacitec! We're excited to introduce you to Gapman Solutions, your resource for all things related to state-of-the-art portable gap measurement devices, the Gapman GEN3 and GapmanGEN4. While Gapman may not be a Marvel superhero, its incredible gap measurement capabilities make it a true industry marvel. With exceptional resolution, readability, and unmatched **speed**, Gapman is the ultimate solution for precision gap sensing.

### In This Edition

Our mission with Gapman Solutions is to shed light on the creative and challenging problems solved by Capacitec's portable Gapman GEN3 and GEN4 technology. In this debut issue, we're diving into the fascinating worlds of **Coating in EV Battery industries**. Discover how our technology has revolutionized product perfection with calibrated slot die gaps in several manufacturing sectors. Don't miss our [Slot Die Application Video](#) to see Gapman in action! [Click Here](#) or Reply to this email if you would like to receive our Slot Die Coating Case Study.

### Beyond Coating and EV Batteries

While this edition spotlights Coating and EV Batteries, we're not limited to these industries. *Capacitec serves a wide range of sectors*, each benefiting from our cutting-edge technology. Explore our other applications and industry solutions: **Aerospace, Automotive, Semiconductor, Power Generation Applications and other Extreme Sensor Environments**.

### Get in Touch

If you're curious about how Gapman's can elevate the accuracy of your projects, visit our website, or reach out to our application engineers. We're here to assist you in harnessing the power of capacitive precision gap sensing and displacement measurement.
