

Greetings again from Capacitec!

Are you using feeler gauges or other mechanical tools to measure thin gaps on production assemblies? Are you dissatisfied with the user subjectivity, poor accuracy, repeatability, and low throughput?

An Alternative Solution: The Gapman Gen3

The Gapman Gen3 is an electronic feeler gauge that eliminates problems with mechanical methods.

The Gapman Gen3 supports a wide range of probes for a tremendous variation of gap measurement applications across many technologically advanced industries. This includes aerospace wing and fuselage assembly, EV battery slot-die manufacturing, Automotive tractor-Trailer structural testing, fit and finish final assembly, and semiconductor production multipoint parallelism measurement.

State-of-the-Art in Gap Measurement: The Gapman Gen4

The Gapman Gen4M NOW supports custom designed multipoint wands which can measure up to 8 unique positions simultaneously. The Gapman Gen4M communicates location data of an entire shim area wirelessly, via Bluetooth connectivity to shim fabrication for increased positional reliability and efficiency.

Additional Focus on Critical Gap and Displacement Measurement

Capacitec serves a wide range of manufacturing sectors, each benefiting from our cutting-edge technology. Explore our applications and industry solutions: [Aerospace](#), [Power Generation Applications](#), and other [Automotive](#), [Semiconductor](#), and [Extreme Sensor Environments](#).

Visit our [Gapman](#) page to learn more about how our technology has transformed product enhancements for our customers.

Get in Touch

To learn more about how the Gapman's features can benefit your projects, visit our [Website](#), or reach out to our application engineers. We're here to assist you in harnessing the power of our advanced sensing solutions and optimizing your operations. Contact us and discover the difference a Gapman can make.
